

## Hear Us Roar

# Cutler Elementary School

### Upcoming Events:

- 5/22/17—Cutler Team Mtg @ 2:30pm, Staff Rm.
- 5/22-23/17—Incoming K Testing
- 5/26/17—CAASPP Testing Ends

### Open House/College & Career Showcase:

It was a beautiful sight on Tuesday as our **K-5 scholars** shared their college and career presentations with ease to all our attendees. Teachers classrooms showcased all the hard work the students are putting in on the daily. The event was a

huge success as we had over 1000 classroom visits. Thank you teachers and staff for working so hard to prepare for this evening. Your **commitment** to providing our students with a college and career **mindset** is greatly appreciated. Our students are learning young that its not “If they will go to college?” but instead “What college will they go to?”

### PBIS Gold Level Award:

On Thursday, we attended the Fresno County Superintendent of Schools **PBIS Model School Award Ceremony**. It was nice to be receiving our award along with GV, Palm, and El Monte Middle School. Our district was well represented.

Cutler Elementary School received the **Gold Level Award** for the 3rd year in a row. This

is a testament to the commitment of all the staff at Cutler School. As we continue improving and refining our PBIS program we are creating young productive citizens that will make our community even better.

### #TheFuture Graduates of the Week:

This Thursday we had another special **VIP** guest join us for lunch. Our K-1 **Graduates** enjoyed having a conversation with our **Pre-school Administrator, Shevonne**

**Swanson**. They introduced themselves to her and told her what they want to be when they grow up. Thank you Mrs. Swanson for taking time out of your busy schedule to come have lunch with our Graduates of the week!

### #College&Career College Thursday:

Our college Thursday this week showcased **Pepperdine University**. Pepperdine University is a private non-profit, coeducational research University. The university's 830-

acre campus overlooks the Pacific Ocean in Malibu, California. The college offers undergraduates a liberal arts education. Each candidate must complete a series of general education courses crossing disciplinary lines. Seaver College students attend classes at the Malibu main campus and study abroad courses are offered at the University's permanent international campuses in Heidelberg Germany, London England, Shanghai China, Washington D.C., Florence Italy, Lausanne Switzerland, and Buenos Aires Argentina. Please visit [www.pepperdine.edu](http://www.pepperdine.edu) for more information on Pepperdine University.

### Career Fridays:

This week's career Friday featured the career of a **professional strength conditioning coach**. The duties of a strength conditioning coach require them to work directly with the head coach of each sport to put together a schedule for strength and conditioning workout times. The strength and conditioning coach can work with an entire team during training sessions as well as with individual athletes. He must provide expert instruction in the use of weight machines and conditioning equipment and be able to tailor different programs based on the needs of the teams or individual athletes. Most schools and professional organizations require strength and conditioning coach to hold at minimum a bachelor's degree in strength training or a related field, and many prefer a master's degree. At the high school level, some schools accept an associate's degree. Strength and conditioning coach must also have a certain number of years of experience in strength training. Colleges and professional teams typically require the applicant to have experience at the college level or above.

**Have a Delightful Weekend!**
